Objectives

I am very interested in programming and am looking for experience in programming.
I worked as a Junior Network & System Engineer at Myanmar Oriental Bank. I have been studying programming for over a year now.
I have python programming basic and can write Php, Laravel, Dart and Flutter Framework. I am also familiar with Database, Git system and to write an API with Python, Php.
I applied for the job because I am interested in any IT environment.

To work in a capacity that will give me opportunity to contribute my skills to the development of a strong dynamic team by utilizing the knowledge and skills that I have acquired from previous work and education.
